# DEEP ROOTS IN LOCAL PRODUCE & SPECIALTY

We vet and verify each local partner, so you know they meet our high standards of quality products in a safe, clean growing and manufacturing environment. Further, we ensure their company values align with what you demand as our customer.

## WHY BUY LOCAL?

### SUSTAINABILITY

Food travels, on average, 1,300 miles from the field to your plate. Locally grown food reduces our carbon footprint.

### CREATES COMMUNITY

There is something special about knowing where your food is coming from and who grew it.

### PEAK FRESHNESS

Local food is fresher and often tastes better than food that has been trucked or flown in from across the country.

### ECONOMIC INVESTMENT

Buying local keeps local dollars circulating within the community.
